Office Action Summary	Application No. 10/710,010	Applicant(s) PIERCE, CAROL	
	Examiner Alfred Basichas	Art Unit 3749	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 8, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Nunemaker (3,985,492), which shows all of the claimed limitations. Nunemaker shows a candlewick straightening device and flame snuffer including, among other things, means candlewick 12, means for extinguishing a candle flame 11, and means for supporting the device and snuffer such that the repositioning means and the extinguishing means are elevated above the support surface (see at least fig. 4). As regards the method claim 9, it should be noted that the method recited is inherent to the invention disclosed by Nunemaker.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3749

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over.

Nunemaker (3,985,492) in view of Schroeder (1,572,316). Nunemaker discloses

substantially all of the claimed limitations, including the device being made of the

claimed materials (see at least col. 4, lines 13-20), but does not specifically recite the

snuffer rotatably mounted. Schroeder teaches a snuffer rotatably mounted via hinge

member 9. While Schroeder does not specifically recite the purpose of the hinge, it is

well within the knowledge of one having ordinary skill in the art that such would permit

for convenience in utilizing the apparatus regardless of the height of the wick in relation

to the user. Accordingly, it would have been obvious to one of ordinary skill in the art at

the time of the invention to incorporate the rotatable snuffer as taught by Schroeder into

the invention disclosed by Nunemaker, so as to provide for convenience of use

regardless of the height of the wick in relation to the user.

Prior Art

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. These references disclose candle snuffers and wick repositioning devices with many, if not all, of the claimed components. Nevertheless, in order to avoid overburdening the applicant with redundant rejections, these references were not applied.
